---

Thank you for sending the report along.

Working on the regulatory side, I don't often get a chance to search out journal articles unless a relevant inquiry arises. I was familiar with the NZ incident from having witnessed several presentations (especially yours) on it. I was able to address the immediate item (I think) using, as background, information regarding the NZ incident that was cited in another document; but it will be much better to have the actual report handy in the future in case a similar inquiry comes up (or the recent one comes around again).

Hope that things are well with you and at the Center in general.

Subject Brodifacoum Kaikoura Publication

Hi Bill, I was out of town the last two weeks and saw that you left a voicemail. The brodifacoum bait spill that occurred near Kaikoura, New Zealand was published in the *Bulletin of Environmental Contamination and Toxicology*. I thought you might have seen it, but I have attached a pdf copy of the manuscript. If you have any additional questions please contact me at your convenience.

Regards,

Tom Primus
